Building Insurance Information

Dear Owners,

Under Florida Law, condominiums are required to have flood insurance when located near the water. Also, the law requires the Association to maintain insurance on the buildings which includes the roof and windows.

Below you will find two tables. One table is a guide to help identify Flood Insurance coverage responsibilities for unit owners and condominium associations based on the National Flood Insurance Program Guidelines and the second table is a guide to identify Hazard Insurance coverage responsibilities for unit owners and condominium associations based on compliance with Florida Statute 718.

If you need additional insurance coverage or proof of insurance please contact the below mentioned.

Please provide this information, if applicable, when asking for a request for proof of insurance.

- Name of the Association
- Name(s) of unit owners or prospective unit owner(s)/borrower(s)
- Property address and unit number
- Loan, reference, or account number

If your mortgage company requests more coverage over and above our coverage of \$169,000 per unit, you may want to get a quote from our agent listed below.

Respectfully, James Walker Punta Rassa Condominium Association Manager The following table is a guide to help identify Flood Insurance coverage responsibilities for unit owners and condominium associations based on the National Flood Insurance Program Guidelines.

A. VERTICAL WALLS 1. Exterior Building Walls A. Mesh, Lath, Sheathing, Glass, Block, Stucco (Painted) B. Studs, Insulation	Responsibility	Responsibility
